## ASKS FIRE RADIO PERMIT.

### Department Wants to Build Broadcasting Station in Brooklyn.

*Special to The New York Times.*

WASHINGTON, June 27.—The New York City Fire Department has applied to the Federal Radio Commission for a construction permit for a radio station at Empire Boulevard and Washington Avenue, Brooklyn, to use 125 watts power and to operate on 1,596 kilocycles.

Experimental Station W2XV, Long Island City, using 500 watts, has asked a license renewal.

WSL of the Mackay Radio and Telegraph Company, Sayville, L. I., asks the use of 11,380 kilocycles as an additional frequency.

The commission today issued its general order No. 94 affecting aviation stations. The new order brings up to date the original aviation plan of the commission, with amendments made since the first order was issued. It does not change the present set-up.
